Where in the neighborhood has "polygon"? (Vertically aligned unit)

- Describe 2D shapes
- Identify 2D shapes
- Combine 2D shapes to create new 2D shapes
- Compare 2D shapes
- Describe and identify 2D shapes
- Cut 2D shapes apart and identify new 2D shapes formed
- Describe attributes of 2D shapes

- Name and draw triangles, squares and rectangles
- Recognize and sort triangles, squares and rectangles
- Sketch 2D transformations such as translations, reflections and rotations in Quadrant I
- Identify the transformation that generates one figure from the other when given two congruent figures on a coordinate grid
- Identify acute, right and obtuse angles in polygons
- Identify parallel and perpendicular lines in polygons
- Identify congruent shapes
- Create and identify shapes with lines of symmetry
