Service Learning – Teaching and learning strategy that integrates meaningful community service with instruction and reflection to enrich the learning experience, teach civic responsibility, and strengthen communities.

Cause – The producer of an effect; the reason or motive for some human action; a principle, ideal, goal, or movement to which a person or group is dedicated; the welfare of a person or group, seen as a subject of concern.

Community Partnership – Individual members and groups within a community working together to serve the specific needs of populations within that community. ECU has established community partnerships with over 100 community organizations and encourages students to become involved in these partnerships.
